quality & trust still count***

Wrap high moisture bales or dry hay

Model 4511 Wrap watch standard

- The **Model 4511 In-line Bale Wrapper** was designed and built for the contractor and farmer looking for reliable, dependable, efficient wrapping. The rigid tubular frame ensures a solid machine under heavy bales of haylage. Wrapping is fully automatic, or you can wrap manually. Hydra steering is manually operated.
- Hydraulic ramp folds down for wrapped hay discharge.
- Compact and rigid machine.
- Guide arms are adjustable for various size bales.
- Raise the hitch with the Hydra cylinder to drive into your tractor or vehicle hitch to tow. Lower the machine to ground for braking and stability during wrapping.
- Simple and easy to use.
- One person operation.
- Wrapping, testing and balancing your quality hay can really pay big dollars.
- Fast wrapping.

Aluminum plate for clean out. Simple to operate.

2-30" Film tensioners. Cage swings open for easy loading of wrap.
